

For Immediate Release - May 2015

First phase of South Street repaving begins Monday, May 4, 2015

The following work will begin 5-4-2015 on the South Street repaving:

- Preparing the roadway surface (milling)
- Placing blacktop over the entire project.
- Traffic will be maintained during this period but delays should be expected. All home and business owners will be notified by the contractor as to how this work will impact parking.
- When Phase I of the repaving is complete further adjustments will be made to manholes and drop inlets. It is estimated that Phase II, the final top course of blacktop will be placed in early June. There will be other incidental work, traffic signals, topsoil and seeding, striping, limited sidewalk work and cleaning the drainage system. This work will have limited to no impact on the traveling public.
 - Work on the project should be complete by the end of July
