'Caring about city streets is caring about the People who use them. The purpose of this website is to keep the people of Auburn and the surrounding areas informed about the progress of the York Street Reconstruction project.

We are all very excited to see this project underway. We recognize the people are share holders in this endeavor and our goal with this web page is to provide you with up to date information on the progress of the project. There will be inconvenience through the summer but as you see the remarkable transformation that is going to take place I'm sure you will agree with us that it is well worth while.

We welcome any suggestions or comments on how we're doing.'

*William Lupien, Superintendent of Engineer Services*

We now we have blacktop from Division Street to the east end of the project. The original end of the project is at the driveway where NUCOR stores their rebar. The City of Auburn has decided that we will continue the paving all the way up to North Street. That work will start this week.

The blacktop work will be completed this week, with the exception of the Top Course which will be done after we complete topsoil work.

This week we will also be working on driveways, sidewalks, topsoil, lighting and the traffic signal at State Street. Things are proceeding really well.

*Last updated September 6, 2013*

## Monday 09/09/13

### Division Street Intersection

- Grading in preparation for placing topsoil.

### Division St to State Street

- Grading in preparation for placing topsoil.

### State St Intersection

- Grading in preparation for placing topsoil.
- Working on new street lights
- Paving blacktop
- Working traffic signal.

### State St to Willey St.

- Grading in preparation for placing topsoil.
- Working on new street lights
- Paving blacktop – extending milling and paving limits to North Street.
- Driveways and Sidewalks, .

This work schedule is contingent upon the weather conditions and unforeseen construction problems. If you feel that construction operations have severely impacted your area without proper notification contact our office immediately. Unexpected water, power or communication interruptions may occur. Every effort will be made to repair such interruptions as soon as possible. We appreciate your patience and apologize for any inconvenience.

This is a reconstruction project which means the entire roadway, along with the drainage system, will be excavated down to virgin earth and an entirely brand new road will be built from the ground up. A totally new highway incorporating the latest in design, material and construction technology. The map below shows the extent of the reconstruction.

Road crews who work in construction sites are part of families who need them, just like your family needs you. In the past five years, more than 11,000 people have been injured and more than 80 people have been killed in work zone crashes. This alarming statistic is punctuated by the fact that nearly all of those killed and injured were drivers or passengers traveling through work zones. With this in mind, it is important to drive with extra caution in work zones. Not just for the families who work in construction zones, but for your family too.

## Consider this

85% of those killed in work zones are drivers or passengers

Work zone fatalities occur every 7 hours—3 per day

Work zone injuries occur every 15 minutes—143 per day
