For Immediate Release: Tuesday, March 10, 2020

Novel Coronavirus (COVID- 19) Update

The Cayuga County Health Department is notifying the public that a COVID-19 test was performed on a Cayuga County resident who has been under precautionary quarantine. The individual had traveled to a country with ongoing transmission of novel Coronavirus.

“We are very appreciative that this individual came forward to the Cayuga County Health Department after returning from overseas travel and was under a precautionary quarantine. This individual recognized the risk associated with their travel, voluntarily reported to the Health Department in an effort to reduce risk of potential exposure and protect the health of the community”, stated Kathleen Cuddy, Cayuga County Public Health Director.

Testing was conducted in collaboration with the Cayuga County Health Department, the individual’s healthcare provider and Auburn Community Hospital following the most recent guidance from the Centers for Disease Control and Prevention (CDC) and New York State Department of Health (NYSDOH). When results are made available the Health Department will provide an update.

There are seven other Cayuga County residents under precautionary quarantine all of which the Health Department has been in contact with and are not experiencing or exhibiting any symptoms of illness.

In the meantime, we are encouraging members of the public to use a common sense approach when trying to prevent the spread of illnesses including Novel Coronavirus (COVID-19).

- Wash your hands often with soap and water for at least 20 seconds. If soap and water are not available, use an alcohol-based hand sanitizer.
- Avoid touching your eyes, nose and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- **Stay home when you are sick.**
- **Do not return to work or school until you are fever free for 24 hours.**
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces.

Have a plan in place should you, a family member or household member need to stay home for an extended period of time due to illness or caregiving.

Steps you can take to prepare in case you or a loved one needs to stay home include stocking up on essentials and those items that would provide you comfort. Some items to consider are:

Auburn, NY 13021**

- Medications (over the counter and prescription), cold and cough medicine, cough drops and vitamins.
- Toilet paper, tissues, diapers and wipes, feminine hygiene products, cleaning products, soap, toothpaste, laundry detergent.
- Food so you do not have to run out to the grocery store like dry goods (rice, pasta, oats, cereal), canned goods (fruits, vegetables, beans), frozen foods and items that will last up to 14 days.
- Infant formula and/or baby food.
- Water and other beverages that provide electrolytes.
- If you have pets, have enough food, medication and kitty litter.
- Items that provide you comfort or are part of your daily routine (coffee, tea, candy, chocolate)
