

2024 AUBURN CONSERVATION CORPS SUMMER CAMP @ CAYUGA-ONONDAGA BOCES August 5-8 • 9:00am-2:30pm

This camp aims to engage and enrich young people through educational, civic-minded, hands-on experiences in outdoor natural resource conservation that will serve their communities by improving the social and natural environment. Open to 12-14 year olds within the nine component Cayuga-Onondaga BOCES school districts. It is also a great way for students to earn community services credits for school organizations.

These practical outdoor activities will introduce students to conservation professions and provide a bridge to gainful employment through occupational modeling:

- Field Work Activities
- Tree Planting and Care
- Measure and Assess Tree Canopy
- Identify and Manage Invasive Plants
- Trail Construction and Maintenance
- Stream Monitoring and Restoration

Campers will be dropped off at Cayuga-Onondaga BOCES Regional Education Center (REC) at 8:45am. They will have training in the morning session at the REC, then go on-site for fieldwork activities.

Limited to 12 campers.

Deadline to enroll is July 3
